

Do you have aphasia from a stroke?

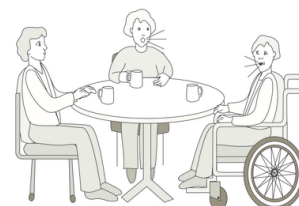

Would you like to tell your story?

My name is **Robyn**. I am a speech language therapist. I would like to hear the stories of people with **aphasia** and their experiences with **speech language therapy**

- Was it a good or bad experience?
- Do people with aphasia get the help they want / need?
- What could speech language therapists do differently?

I would like to interview people with aphasia who live in Aotearoa New Zealand.

The interview may be in-person or using a computer to talk by video call.

Everyone who takes part will receive a \$25 supermarket voucher

If you have aphasia **from a stroke** that happened between 2015 and 2019, and you would be willing to talk to me,
