

Understanding ‘who you are’ and what is important to you in stroke rehabilitation

Tēnā Koe,

We are conducting a research study to understand how health professionals get to know their patients and whānau, and what is important to them during stroke rehabilitation.

We are seeking stroke survivors and/or their family/whānau to participate in one interview (45-60 mins) via Zoom to learn more about their experiences during stroke rehabilitation. You may have a support person present for the interview. If you live in Christchurch, you may choose to do the interview face to face.

Are you either:

Stroke Survivor	Family/whānau of stroke survivor
*A person who has had a stroke within the past year AND	*Family/whānau of someone who has had a stroke within the past year AND
*Participated in a rehabilitation program in hospital	*Involved in the stroke survivor’s rehabilitation in hospital
*Over the age of 18	*Over the age of 18

If you have answered ‘yes’ to all questions in either list and would like more information or are interested in participating, please contact the primary researcher:
